

LAB EXERCISE - 18/09/2023

1. Write a CSS which shows a 100px * 100px blue <div> element. The <div> element has also specified a transition effect for the width property, with a duration of 2 second.
2. Write a CSS which shows <div> element with transition effect and 1 second delay before starting of transition.
3. Write a CSS which shows <div> element with transition effect and specifies how many seconds or milliseconds a transition effect takes to complete.
4. Write a CSS which shows <div> element with transition effect and specifies the name of the CSS property which is used for transition effect.
5. Write a CSS which shows <div> element with transition effect and specifies the speed curve of the transition effect.
